**Mini Solar Car**

**33\*20mm**

**eco-friendly product, promotion gift**

asi 79909

This solar toy is designed as a mini solar car, which can get power directly from the sun. It can start its mic-motor by running fast when the solar car is exposed to the sunlight. No battery needed!

Powered by sunlight, this solar car can start the engine and running fast itself. Specially designed and eco-friendly, this solar car is also an excellent teaching article to provide students with some basic knowledge about the solar energy. Besides, it is a hot selling gift item for kids too.
