Solar Cockroach

40*20mm

environmental solar toys, teaching article

This solar toy is designed as a solar cockroach, which can get power directly from the sun. This solar cockroach can start its mic-motor by shaking itself when it is exposed to the sunlight. No battery needed!

Powered by sunlight, this solar cockroach can shake itself, seemingly forward or backward, spinning around as if it is looking for food. Specially designed and eco-friendly, this solar toy is also an excellent teaching article to provide students with some basic knowledge about the solar energy. Besides, it is a hot selling gift item for kids too.
